### BEGONIAS – Tuberous-rooted

No other bulbous subject has increased in popularity over the past few years so much as these Begonias. They make a very useful and beautiful pot plant for early spring but they serve their best purpose when grown outdoors—for here they provide a continuous feast of beauty until cut down by frost. We have reports from our Belgian growers that they have a good crop this season so we expect to deliver very nice bulbs.

## AMARYLLIS – Giant Hybrids

There are vast differences in the quality of the various strains of Amaryllis being offered and we believe that our stock contains a much larger percentage of the full rounded petals and bright, solid colors than is usually available at comparable prices

For house culture the ease with which they can be flowered makes them the outstanding subject for this purpose and they also make a beautiful pot plant for florist use. The colors are mixed and range from pure white through the various pink shades to deep red
